FOCUS GROUPS

On 18 June 2025, project partners met online to conduct a focus group session aimed at gathering insights and discussing the needs and expectations of the project's target groups.

The meeting provided an opportunity for partners to exchange perspectives, identify key areas of interest, and define the information required for further project activities. Through a collaborative discussion, participants explored important topics and contributed valuable feedback that will support the project's implementation.

A key outcome of the focus group was the development of the Customer Survey Questionnaire, which will be used to collect data from stakeholders and better understand their needs, preferences, and expectations.

The questionnaire will provide essential input for the next stages of the project and help ensure that future activities and outputs are tailored to the needs of the target audience. We would like to thank all partners for their active participation and valuable contributions.
